AYOUB RAFFASS

— SENIOR JAVA/ANGULAR SOFTWARE ENGINEER —

Paris, France | 0758525898 | ayoubraffass@gmail.com

SKILLS

- Java 7 to 21, JAVA EE, Spring (Boot, Batch, MVC, Data), Microservices, Elastic, Kafka, JPA, Hibernate, JUnit, JDBC, Swagger UI, API (REST/SOAP), JSF, JSP, Bootstrap, Angular 9+
- MySQL, Oracle SQL Developer, Postgres, Mongo
- Git, GitHub, JIRA, Confluence, SonarQube, Postman, Jasmine, karma, Eclipse IDE, VS Code, IntelliJ
- HTML, CSS, XML, JavaScript, SQL, PL/SQL, Docker, Azure
- Méthodologie Agile Scrum, UML

EDUCATION

ENGINEERING DEGREE IN COMPUTER SCIENCE, SOFTWARE ENGINEERING OPTION

École Nationale des Sciences Appliquées - Al-Hoceima, 2019

HIGHER EDUCATION DIPLOMA - DUT

Ecole Supérieur de Technologie - Safi, 2016

LANGUAGES

French : Fluent
English : Fluent

WORK EXPERIENCES

Gravitee.io - Remote — **2025 - Present**

Senior Software Engineer

- ***API Management platform***: Development on Gravitee APIM, an open-source API management solution (Gateway, Management API, Console, Developer Portal).
- ***Missions and achievements***: Datadog reporter integration across multiple repositories, OpenAPI 3.1 multi-type schema support, V4 API lifecycle fixes in the Kubernetes Operator (GKO) CRD export, tracing/processor components, Developer Portal bug fixes.
- ***AI Gateway (LLM team)***: Bringing LLM, MCP and A2A proxy pages to the new Gamma console: reporter settings (logging, OpenTelemetry), sharding tags configuration, deployment history with diff and rollback, audit logs.
- ***AI-assisted development***: agentic workflow with Claude Code, running parallel sessions across repositories.
- ***Technical environment***: Java, Angular, Kubernetes (GKO), OpenTelemetry, Datadog, LLM / MCP / A2A, JIRA, Git, GitHub.

HubOne - Group ADP, CDG Airport — **June 2024 - 2025**

Fullstack Java / Angular Software Engineer

- ***STROMAE*** Project: Strategic solution for managing the lifecycle of quotes and orders, covering the configuration of commercial offers, their transformation into orders, and the orchestration of downstream processes.
- ***Missions and achievements***: Implementation of a centralized catalog, product hierarchy management, mass import/export, development of the quote module, PDF generation, integration of contracts and profiles, automation of quote-to-order conversion, implementation of order flows
- ***Creation*** and integration of front-end components in Angular
- ***Optimization*** of performance and code for production
- ***Writing*** and maintaining clean, well-commented code that complies with standards.
- ***Writing*** unit and integration tests to ensure code quality.
- ***Methodology***: SAFe, Agile Scrum (Scrum team work, inter-team coordination via SAFe, participation in PI Plannings, regular demonstrations, and functional workshops).
- ***Technical environment***: Java 17/21, Spring-boot 3, Angular 17, Microservices, Elastic, Kafka, MongoDB, Jenkins, Sonar, Postman, Junit, Mockito, JIRA, Confluence, Git, GitLab.

SIB, Rennes — **June 2023 - June 2024**

Fullstack Java Software Engineer

- ***Sillage Project***: Medical information, care, and support system, communication, sharing, and coordination tool for healthcare professionals.
- ***Built*** from a set of general and specialized modules, Sillage is an integrated information system.
- ***Definition*** of test architecture, development of unit/integration tests in jUnit 5
- ***Needs*** analysis and writing of technical and functional specifications
- ***Coding*** solutions in Java, using frameworks such as Spring and Hibernate
- ***Ensuring*** code quality through unit and integration tests
- ***Performance*** optimization and resolution of technical issues
- ***Technical environment***: Java 17, Spring-boot 3, Rest web services, Oracle SQL, Jenkins, Sonar, Postman, Junit, Mockito, JIRA, Confluence, Git, GitLab.

Bank Of Africa **Apr 2022 - June 2023**

Fullstack Java / Angular Software Engineer

- ***Project 1***: Development of the electronic signature platform | ***AfricSign***.
- ***Missions***: project structure development, interfaces, REST APIs, SCRUM meetings, unit tests, SONAR coverage.
- ***Environment***: Java 11, Angular 9, Spring-boot, Rest web services, JWT, Oauth 2, Oracle SQL, Jenkins, Sonar, Postman, Junit, Jasmine, Karma, JIRA, Confluence, Git, GitLab.
- ***Project 2***: Pricing and billing management system | TARFAC.
- ***Missions***: evolutionary maintenance, batch development, JAR connector, unit tests, SONAR coverage, documentation.
- ***Technical Environment***: Java 11, Spring Batch, Spring MVC, EJB, Soap web services, Maven, Oracle SQL, Jenkins, Sonar, Postman, Junit, JIRA, Git.

Orange Business **Dec 2020 - Apr 2022**

Fullstack Java / Angular Software Engineer

- ***Project 1*** - ***Order Tracking***: tracking the steps of an order, from appointment scheduling to delivery.
- ***Project 2*** - ***Project Tracking***: detailed tracking with indicators, batch tracking.
- ***Missions***: needs analysis, front/back development, REST web services, unit tests, Sonar coverage, internationalization, English presentations, Angular workshops, CI pipelines, Azure deployment.
- ***Technical Environment***: Java 11, Angular 14, Spring boot, Rest web services, Swagger UI, TDD, Sonar, PostgreSQL, Junit, Jasmine, Karma, Azure, Docker, Kubernetes, Git, GitLab.

SCOR, Casablanca **June 2019 - Dec 2020**

Fullstack Java Software Engineer

- ***Project 1*** - ***ForeWriter:*** Evolutionary and corrective maintenance of the ForeWriter risk management ecosystem for SCOR.
- ***Project 2*** - ***OffshoreDB:*** Integration of the new application into the ForeWriter ecosystem.
- ***Implementation*** & integration of web services
- ***Provided*** technical support to the development team
- ***Provided*** functional support to the client representative
- ***Oversaw*** the technical onboarding and integration of new recruits/interns within the team
- ***Technical Environment***: Java 7, Java Server Faces (JSF), JSP, PrimeFaces, Spring, Spring MVC, SOAP Web Services, Maven, Kibana, Elasticsearch, Logstash, Hibernate, JPA, Oracle PL/SQL, MySQL, Git, SVN.
